

## TGRS at TMC Pediatrics Patio

Tuesday, October 11, 2011

This morning culminated several days of work by myself and my helpers, Bob Conrad, Bill Nevin, CAP Pearson and Thorne Pierce. Last week we set the bridges, and Monday we began laying track for the layout TGRS is building in one of the patios of Tucson Medical Center adjacent to their new Pediatrics wing. Monday, Glenn Mitchell came in and laid the power and control wiring lines, and today we completed the track placement. Here are some photos of the track in place. (1) Ballasting will begin shortly, when TMC's people bring in some fill dirt to use in transitioning the track from the bridge decks to the ground.

Meanwhile, I've kept busy building the train shed that will house the trains when they are not running. Some pictures of that shed are attached. (2) Next week I'll be looking for volunteers to help place trim and shingles on walls and roof of the shed. Please let me know if you can help.
