

Plants, Planting and Tools

Rillito Nursery

June 12, 2010

Twenty four members of the TGRS met at the Rillito Nursery to attend a walking tour and lecture pertaining to plants, planting and tools. After helping ourselves to home baked goodies and coffee we began our tour of the nursery with one of their certified nursery technician. As we walked along the pathways of the nursery, many plants were pointed out to us that could be used on our garden railroad layouts. It was a unique opportunity to have a question and answer period as we walked through the nursery. All the members received valuable information on what could be used around their homes or on various garden railroads. After the clinic was over, members walked around the nursery looking for that special item to take home and plant or display. No doubt, TGRS members will return to the Rillito Nursery again to purchase unique plants.
